

CARBIT™ BLADES AND TIPS

In extreme scarifying applications, VBL™ CARBIT™ Blades and Tips are the clear choice.

VALLITE™ heat treated (thru-hardened) blades with replaceable carbide tips offer the best performance for scarifying roads. A variety of rotating and fixed (non-rotating) tips are available to tailor this product to any application. The CARBIT™ system is available in different sizes to suit all sizes of OEM machines.

VBL applied tungsten carbide matrix (TCM™), hard facing or strips of hardened plate (VALSTRIP™) are available as options to prevent premature base material wear “washout”.

VBL heat treated parts are warranted against breakage throughout the useable life of the part.
