

## IDEAL PIPE

Plastic culverts made from high density polyethylene resin, which meets or exceeds the requirements of cell classification 324420C as defined in ASTM D3350. These pipe are resistant to a wide range of soil acidity: pH 1.25 to 14.

Sizes range from 4" – 48" to meet all your industrial and agricultural needs.

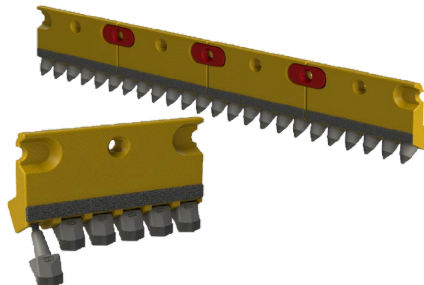

Valley Blades Ltd manufactured cutting edges and snow plow blades for any OEM machine in the municipal, agricultural or industrial market. We always have a large stock of grader blades or are ready to find the blade to fit your machine.

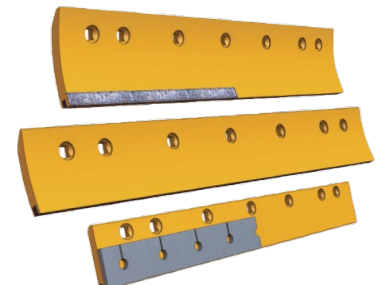

Hot rolled alloy steel, heat treated and stress relieved for unmatched thru-hardness and impact strength.

Curved: (1/2" X 6") to (1" X 8")  
Flat: (5/8" X 6") to (3" X 16")

When safety and performance are critical choose VBL™ locking, sectional, forged, heat-treated CARBIT™ system. CARBIT LINK™. Bits also available.

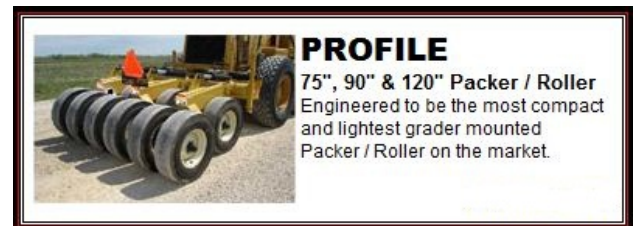

For extra long life in abrasive conditions or plowing snow, choose Carbide Insert blades.

Carbide Facing for small rock roll over HT Plate for large rock roads.

Manufacturing 70", 90", and 120" Packer Rollers Handy Hitch has created the most compact and lightest grader mounted packer on the market

## The Degelman REV 1500

### **OVER-SIZED GEARBOXES**

The over-sized Omni gearbox is designed and built to exacting standards for maximum life expectancy.

### **HEAVY-DUTY BLADE CARRIERS**

The blade carrier is made from three quarter inch steel plate that is four times thicker than most conventional pans.

### **LONG LASTING BLADES**

Heavy-duty 5 inch wide, twist blades are longer lasting and more resistant to bending and breaking.

### **Sidearm Advantage**

With the Degelman Sidearm an operator can cut where it's never been possible to cut before-safely. The operator can stay on the road and position the cutter 50 degrees on either side of the road. Cut from the right, the left or straight back.
