

## SERRATED CARBIDE TIPPED GRADER BLADES

In frozen road scarifying or "Ice Blading" applications choose VBL™ Serrated Carbide Tipped Grader Blades for long wear life.

Tungsten carbide inserts brazed into specially prepared areas in the blade will increase wear life several times when compared to conventional blades. This makes serrated carbide tipped grader blades ideal for severe wear applications. Various sizes and configurations of tungsten carbide inserts are available to suit any application.

Serrated carbide tipped grader blades are available in various sizes of flat and curved profiles\*, with hole sizes and patterns to suit all OEM equipment.

\*Custom size configurations available on request

(See also: CARBIT™ BLADES AND TIPS)

VBL heat treated parts are warranted against breakage throughout the useable life of the part.
